Summary

I am a full-stack web developer with experience using Python and MEAN (MongoDB, ExpressJS, AngularJS, Node) and Ruby on Rails stacks. Using these stacks I have built numerous web applications with full CRUD (Create, Read, Update, and Delete) operations. I enjoy programming very much since it allows me to use my cognitive skills to solve difficult problems. I hope to utilize my knowledge and skills to help contribute to the advancement of the technology industry.

Technical Skills

Front-End Development – HTML5, CSS3, JQuery, AngularJS, AJAX, React
Languages – Javascript, Python, Ruby, TypeSript
Databases – MySQL, MongoDB, SQLite3, Mongoose.js
Methodology – OOP, MVC, CRUD Operations, RESTful
Frameworks – Rails, Flask, Django, Express, Socket.io, Node.js
Version Control – Git/Github

Projects

• BLACK JACK https://github.com/thinhle93/BlackJack - in progress
Description: A Black Jack game using sockets to allow for multiplayer.
Technologies: JavaScript, MongoDB, Angular, Socket.io, Express, Node.js
Future plans: add a dealer, resetting game when there is new player, CSS styling

• SHAREPICS (MEMEFUL) https://github.com/thinhle93/sharepics - in progress
Description: A web application allowing users to submit pictures to the database and view other pictures that other users submitted along with description of each picture. Please read the README on GitHub for more information on this project.
Technologies: Ruby, Rails, MySQL, paperclip GEM
Future plans: Add points system to images and comments.
